

Digitalisation and new media are an important part of contemporary art and culture. With its *Digital Culture* programme Pro Helvetia has responded to this new impulse. The current issue of *Passages*, Pro Helvetia's cultural magazine, demonstrates that this digital turn enables new forms of creativity, from net art to game design.

The project, *Mobile. In touch with Digital Creation* supports Swiss creative professionals who make innovative use of new technological possibilities. Swiss game designers like Mario von Rickenbach, Etter Studio and Apelab, who have been supported by Pro Helvetia, have already gone on to achieve international success.

This month Pro Helvetia New Delhi has invited Christian Etter to visit India to introduce *Drei* to Indian audiences. Etter Studio's *Drei*, which won a prize in the Swiss Games call for projects, was nominated for 'Excellence in Visual Arts' at the Independent Games Festival in San Francisco.

Join us in Goa and Bangalore to hear Christian Etter dissect the creative process that led to the creation of the award-winning computer game *Drei!*
